The Department of Pathological Anatomy was founded in October 1920 by the first rector of the Kuban Medical Institute, the famous pathologist Professor Nikolai Fedotovitch Melnikov-Razvedenkov.

From 1924 to 1926 the department was headed by Associate Professor Vladimir Vasilyevich Lauer. A. V. Abramov worked as an assistant at the department. In 1926, Professor Georgy Stepanovich Kulesha was elected head of the department. Assistants M. K. Dal, I. M. Malinin and S. M. Pokrovsky worked with him. In 1928, G.S. Kulesha published a two-volume textbook on pathological anatomy. From 1930 to 1941 the department was headed by Professor Ivan Mikhailovich Malinin.

In 1941 to 1947, Sergei Mikhailovich Pokrovsky was in charge of the Department of Pathological Anatomy. At the department during this period there was one assistant S. S. Kasabyan. In 1947, associate professor Georgy Pavlovich Milash was appointed head of the department. S. M. Pokrovsky, V. P. Litsmanenko, K. P. Kosova, Z. I. Barabash worked as assistants.

From 1962 to 1988, the department was headed by Professor Nina Vladimirovna Onopchenko. During these years, associate professors G. P. Milash, V. A. Dobrynin, M. A. Gunko, V. M. Eremin, I. F. Ivanichenko taught at the department; assistants, candidates of medical sciences N. Yu. Belozarov, G. N. Kucheryavy, B. M. Shvyryaev. The staff of the department carried out scientific research in the field of oncomorphology. More than 50 candidate and doctoral dissertations have been completed under the guidance of Professor N.V. Onopchenko.

From 1988 to 2002, Professor Leonid Aleksandrovich Faustov headed the department. He was supervisor of one and scientific advisor of three Ph.D. theses. Associate professors M.A. Gunko, V.M. Eremin, I.F. Ivanichenko, L.R. Kurashvili; assistants M. M. Baranova, I. S. Bukhmastova, E. A. Vostropyatova, Yu. N. Gubonin, V. I. Kostrub, E. V. Lokhmatikhina, V. L. Makovetskaya, A. B. Pavlova, V V. Sudakov, V. A. Sychev. In September 2002, by decision of the Academic Council of KSMA, the Department of Pathological Anatomy was reorganized by merging with the Department of Forensic Medicine. The united department was headed by Professor Valery Anatolyevich Porodenko.

In December 2003, an independent department of pathological anatomy was re-established. In 2004, Professor Alexander Alexandrovich Slavinsky was elected head of the department. Under his leadership, 15 PhD theses were prepared. The staff of the department were associate professors G. V. Nikitina, L. R. Kurashvili, assistants B. V. Balachevsky Zh. M. Vasilcheva, E. S. Sevostyanova, senior laboratory assistant A. B. Pavlova. Currently, associate professors L. M. Chuprinenko (head of the educational part of the department), A. A. Verevkin, V. L. Drushevskaya, A. S. Sotnichenko, assistant S. V. Skazkina work at the department.

In the educational process, the department widely uses computer technology. Classrooms are equipped with electronic screens with digital media. Lectures and practical classes are provided with multimedia presentations, a digital collection of macro- and micropreparations has been created.

The main scientific directions of the department are "Parenchymal-stromal interactions and intercellular cooperation in inflammation reactions and graft rejection" and "Structural and cytochemical signs of activation of neutrophilic blood leukocytes and cellular infiltrate in inflammatory and ischemic tissue damage." The teachers of the department work in the Laboratory of Fundamental Research in the field of regenerative medicine and in the pathoanatomical department of the Clinic of the Kuban State Medical University of the Ministry of Health of Russia.
